***Types of data processed***

**Navigation data.** The computer systems and software procedures designed for this website acquire, during their normal operation, some personal data whose transmission is implicit in the communication protocols of the Internet. This information is not collected to identify interested parties but by its very nature could, through processing and association with data held by third parties, allow users to be identified. This category of data includes IP addresses or domain names of computers used by users accessing the website, addresses in Uniform Resource Identifier (URI) notation of requested resources, the time of requests, the method used to submit the request to the server, the size of the file obtained in response, the numerical code indicating the status of the response from the server (e.g. successful, error, etc.) and other parameters regarding the operating system and user's IT environment. These data are only used to obtain anonymous statistical information on the use of the website, to check its correct functioning and they are deleted immediately after processing. Such data may be used by competent authorities to determine responsibility in case of hypothetical computer crimes against the website: except for this case, data relating to web contacts are not retained for more than seven days.

**Data provided voluntarily by the user.** The optional, explicit, and voluntary sending of email to the addresses indicated on this website will subsequently lead to the acquisition of the sender's address, necessary to respond to the requests, in addition to further personal data as part of the message. Specific summary statements will progressively be reported or displayed on pages of the website prepared for special services available on request.
